Product (article) characteristics		
Physical form of product Liquid		
Dustiness	Low potential to produce inhalable/respirable dust concentrations	
Viscosity, dynamic	< 10 cP	

Technical and organisational conditions and measures	
Technical measures	On-site wastewater treatment prior to discharge to sewer or public waterway. Gaseous emissions purification by means of a scrubber tower (good practice). The waste is recycled or managed in accordance with the legislation
Prevent environmental discharge consistent with regulatory requirements. Do not apply industrial sludge to natural soils

Product (article) characteristics		
Physical form of product Liquid		
Dustiness	Low potential to produce inhalable/respirable dust concentrations	
Viscosity, dynamic	< 10 cP	

Amount used (or contained in articles), frequency and duration of use/exposure	
Variable between ml (sampling) and cubic meters (transfers).	
Covers daily exposures up to 8 hours	≤ 5 days/week

Technical and organisational conditions and measures	
Technical measures	Work equipment must be in good working condition and must be properly maintained. Clean up spills immediately. Order and cleanliness must be maintained in the workplace. The use of closed/automatic systems for handling the product is recommended, as well as coverage of open containers (e.g. by means of screens). Filling of containers with automatic dosing systems is recommended. It is recommended to clean the equipment and lines before disconnection and/or maintenance

# Annex to the safety data sheet: Exposure scenario

Product form: Mixture Physical state: Liquid

Technical and organisational conditions and measures	
Organisational measures	Workers must be trained to (a) not perform unprotected work,(b9) know the hazards of the product,(c) comply with the safety procedures provided by the operator of the user facility. The Facility Owner must ensure that the required PPE is available and used in accordance with the instructions for its use and established work procedures. Regularly monitor exposure levels, conditions of use and effective implementation of risk management measures (RMMs). If concentrations exceed the limits, RMMs and operating conditions shall be immediately reviewed in order to reduce exposure. Discharge into the environment must be avoided. Clean up spills immediately

Conditions and measures related to personal protection, hygiene and health evaluation	
Skin and body protection	Avoid contact with skin. Use your standard work clothes. In case of long contact with the product and risk of splash of its dissolutions use full waterproof suit
General protective and hygienic measures	Always wash your hands immediately after handling this product, and once again before leaving the workplace
Wear respiratory protection when its use is identified for certain contributing scenarios.	Full face piece respirator. Respiratory protective device with a particle filter
Hand protection	Wear suitable gloves tested to EN374
Eye protection	Safety spectacles with side shields

Other conditions affecting workers exposure
