Product for leather industry

DESCRIPTION

Acrylic monomers polymer in aqueous emulsion.

CHARACTERISTICS

Appearance	: Yellowish translucent liquid
pH	: 8 - 9
Viscosity	: < 100 cP
Percent Solids	: 19 - 20 %
Film	: Transparent, gleaming and uniform
Shelf life	: We recommend not keeping the product for more than 9 months.

Note: The parameters indicated here are not necessarily the specifications of the product. These will be agreed with each customer and will be a part of the contract that must be respected for each batch supplied.

APPLICATION

- The product can be dosified directly or diluted with water in any proportion.

BENEFITS

- Resin for leather finishing.
- Great penetrating capacity.
- It provides finished products with an excellent shine.
- Good water resistance.
- Highly flexible.

STORAGE AND DISTRIBUTION

- The product should be kept in a covered place, the container tightly closed, protected from sunlight and within the temperature range recommended in Section 7 of the Safety Data Sheet.
- Once the container is open, avoid contamination with any other water based product and/or with strong bases. Check the Material Safety Data Sheet.
- Take all the habitual precautions when handling any chemical product. Avoid contact with eyes, skin or clothes. Though it does not produce dangerous vapours under normal handling we recommend using the product in well ventilated areas.
- There is a great variety of containers. Check with our Customer Service in order to choose the most convenient one.

REGULATORY

Consult our technical staff in case of doubt.
