Product for leather industry

DESCRIPTION

Product for leather tanning.

CHARACTERISTICS

Type of product	: Acrylic acid copolymer in aqueous solution
Appearance	: Colourless to yellowish transparent liquid
Ionic character	: Anionic
Odor	: Almost odourless
Density	: 1 g/cm ³
pH	: 6 - 8
Viscosity	: 10000 - 50000 cP
Percent Solids	: 28 - 29 %
Shelf life	: We recommend not keeping the product for more than 6 months.

Note: The parameters indicated here are not necessarily the specifications of the product. These will be agreed with each customer and will be part of the contract that must be respected for each batch supplied.

APPLICATION

- Product compatible with anionic and non-ionic substances (not compatible with cationic substances and metallic salts). It may form unstable blends in contact with concentrated sulphuric acid.
- For most of applications, owing to its high viscosity, we recommend diluting the product with water.
- Consult our technical staff in case of any doubt.

BENEFITS

- It provides filling effect.
- It equates imperfections and improves the leather firmness.
- It allows to lengthen the leather.
- It offers better skin flexibility than other technologies.

STORAGE AND DISTRIBUTION

- The product should be kept in a covered place, the container tightly closed, protected from sunlight and within the temperature range recommended in Section 7 of the Safety Data Sheet.
- Once the container is open, avoid contamination with any other water based product and/or with strong bases. Check the Material Safety Data Sheet.
- Take the habitual precautions when handling a chemical product. Avoid the product to contact with eyes, skin or clothes.
- There is a great variety of containers. Check with our Customer Service in order to choose the most convenient one.

REGULATORY

Consult our technical staff in case of any doubt.
