HYGEL HZ339C

Product for detergency

DESCRIPTION

Polymeric HASE (hydrophobically modified alkali swellable emulsions) thickener for detergents.

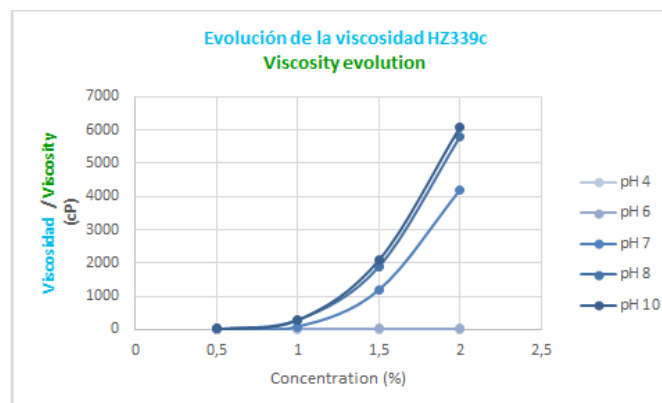

INCI Name*: Acrylates copolymer

*The composition breakdown is available in the General Statement

CHARACTERISTICS

Type of product	: Polymer of acrylic monomers in aqueous dispersion.
Appearance	: White milky liquid
Density	: 1.01 – 1.05 g/cm ³
pH	: 3 – 5 (100%)
Viscosity	: ≤ 50 cP
Percent Solids	: 29 – 31 %
Shelf life	: We recommend not keeping the product more than 12 months

Note: The parameters indicated here are not necessarily the specifications of the product. These will be agreed with each customer and will be part of the contract that must be respected for each batch supplied. Derypol guarantees the quality of the product, in the terms agreed with the client as "product specifications", during the time established as the warranty period (shelf-life), as long as it is kept in good conditions, according to the recommendations indicated in section 7 of our MSDS. For any formulation of the product, it will be the client responsibility to carry out the necessary studies to guarantee that the stability and characteristics are as desired. Derypol assumes no responsibility regarding the stability and characteristics of such formulations.

APPLICATION

- It can be dosed directly without previous dilution, or diluted in water for any proportion.
- Soluble in water at pH>7.
- It is recommended applying the product in an acid media, always before adjusting the pH, in the beginning of the formulation.
- Light solubility in solvents.
- Derypol guarantees the quality of the product, in the terms agreed with the client as "product specifications", during the time established as the warranty period (shelf-life), as long as it is kept in good conditions, according to the recommendations indicated in section 7 of our MSDS. For any formulation of the product, it will be the client responsibility to carry out the necessary studies to guarantee that the stability and characteristics are as desired. Derypol assumes no responsibility regarding the stability and characteristics of such formulations.
- Consult our technical staff in case of any doubt.

BENEFITS

- Anionic thickening agent for aqueous solution in a wide range of pH (neutral to highly alkaline pH). It tolerates very well the presence of different salts in the composition (sodium chloride, magnesium chloride, etc.). It is pH - dependant.
- Very easy to handle and dissolve.
- It can work alone or combined with surfactants.
- It provides high performance in transparency and viscosity of the final product.

STORAGE AND DISTRIBUTION

- The product should be kept in a covered place, the container tightly closed, protected from sunlight and within the temperature range recommended in Section 7 of the Safety Data Sheet.
- Once the container is open, avoid contamination. Check the Material Safety Data Sheet.
- Take the habitual precautions when handling a chemical product. Avoid the product to contact with the eyes, skin or clothes.
- There is a great variety of containers. Check with our Customer Service in order to choose the most convenient one.

REGULATORY

Consult our technical staff in case of any doubt.
