Product for textile industry

DESCRIPTION

Fixer color in textile.

Its main ingredients are: polymer, surfactants and water.

CHARACTERISTICS

Type of product	: Cationic acrylic copolymer in aqueous emulsion
Appearance	: White milky liquid
Ionic character	: Cationic
Odor	: Slight acrylic odor characteristic
Density	: ≈ 1 g/l
pH	: 5 - 5.5
Viscosity	: 0 - 200 cP
Percent Solids	: 40.5 - 42.5 %
Shelf life	: We recommend not keeping the product for more than 6 months.

Note: The parameters indicated here are not necessarily the specifications of the product. These will be agreed with each customer and will be part of the contract that must be respected for each batch supplied.

APPLICATION

- It can be dosed directly without previous dilution, or diluted in water for any proportion.
- This product can be used alone or as a component in blends.
- Cationic resin specifically designed for its use in blends of cationic products.
- Consult our technical staff in case of any doubt.

BENEFITS

- Versatile product that can be successfully used for different types of fabrics and colours.
- Good resistance to water and washing operations.
- It helps to provide a good film flexibility.

STORAGE AND DISTRIBUTION

- The product should be kept in a covered place, the container tightly closed, protected from sunlight and within the temperature range recommended in Section 7 of the Safety Data Sheet.
- Once the container is open, avoid contamination with any other water based product and/or with strong bases. Check the Material Safety Data Sheet.
- Take the habitual precautions when handling a chemical product. Avoid the product to contact with eyes, skin or clothes.
- There is a great variety of containers. Check with our Customer Service in order to choose the most convenient one.

REGULATORY

Consult our technical staff in case of any doubt.
